Abu rolled up his paper hat very tightly and put it in a bottle. He put a cork in the bottle and threw it into the ocean. Three days later the bottle washed up on a tiny island twelve miles away. If the bottle traveled the same distance each day, how many miles did the hat in the bottle travel each day?

Jack was in the Navy. One day the wind caught his hat. It blew away from the ship, landed in the water, and washed up on Marko Island, one hundred thirty-four miles from the ship. Nathan was a fisherman. One day the wind blew off his hat. It landed in the water and washed up on Marko Island, nine miles from Nathan's boat. How much further had Jack's hat traveled than Nathan's hat had traveled to get to the same island?

Can you name the mystery three-digit number?

The tens digit is 2 more than the ones digit.

One of the digits is 7.

If you add the hundreds and the tens digits, the sum is 9.

If you multiply the tens and the ones digits, the product is 35.
