A year on Mars lasts 687 days. Robot Pete lives on Mars. He is exactly 5 Mars years old.

That means he was born 3,435 days ago, assuming a robot was born, which makes no sense. But who cares!

Robot Pete's older brother Jack was born 308 days before Pete. How many days old is Jack? Don't forget, to be older, Pete should be MORE days old than Jack! If your answer is less than 3,435 then think again.

Make your own
