Name: \_\_\_\_\_

Katherine, Samuel, Matthew, and Rachel each have a car. This year, they each drove a different distance. The distances were: 2,565, 2,279, 2,814, and 2,428 miles. The speedometer on each of the cars keeps track of the total number of miles the cars have been driven. The current speedometer numbers on the cars are 41,556, 41,425, 41,024, and 42,223 miles.

Figure out how many miles each person drove their car for this year and the total number of miles that has been driven (the current speedometer reading).

1. Katherine drove more than 2,400 miles this year.
2. Rachel drove two hundred forty more miles than Katherine this year, rounded to the nearest tens.
3. The person that drove two thousand, four hundred twenty-eight miles this year does not have a speedometer reading of forty-one thousand, twenty-four.
4. The person that drove two thousand, four hundred twenty-eight miles this year does not have a speedometer reading of forty-one thousand, five hundred fifty-six.
5. Matthew's current speedometer reading is neither forty-one thousand, twenty-four nor forty-one thousand, four hundred twenty-five.
6. Matthew drove one hundred fifty fewer miles than Samuel this year, rounded to the nearest tens.
7. The combined total miles that Rachel and Matthew have put on their cars, rounded to the nearest hundreds, is eighty-three thousand.

Katherine drove \_\_\_\_\_ miles this year. His or her car's speedometer reads \_\_\_\_\_ miles.

Samuel drove \_\_\_\_\_ miles this year. His or her car's speedometer reads \_\_\_\_\_ miles.

Matthew drove \_\_\_\_\_ miles this year. His or her car's speedometer reads \_\_\_\_\_ miles.

Rachel drove \_\_\_\_\_ miles this year. His or her car's speedometer reads \_\_\_\_\_ miles.

Name: \_\_\_\_\_

Robert got 2 personal pizzas. He cut his pizza into 7 equal slices and then ate 4 slices. He gave the other pizza to April. She cut her pizza into 8 equal slices and then ate 6 slices. Draw a picture of each pizza.

Who ate the most pizza?

Gavin cannot decide which of the following two clubs to join, so he wants to pick the club with the most boys. Which club should he join?

The Earth Club has a total of 43 members. There are 5 more girls than boys.

The Gamer's Club has a total of 50 members. There are 6 more girls than boys.

Amanda and Wendy are weighing their rock and fancy stone collections. Whose collection weighs the most?

Amanda has five yellow stones that each weigh nine ounces, six blue stones that each weigh eight ounces, and some bigger rocks that altogether weigh exactly ten pounds.

Wendy has three blue stones that each weigh eleven ounces, four red stones that each weigh ten ounces, and some bigger rocks that altogether weigh exactly eleven pounds.

1 pound = \_\_\_\_ ounces

Adam tried to measure his resting heart rate. His heart beat a total of 18 times in 24 seconds. Ava measured hers. She counted a heartbeat of 167 in 150 seconds.

Well-trained athletes tend to have resting heart rates that can be as slow as 40 beats per minute. Would you guess that Adam or Ava was a well-trained athlete?
